

6516205070.txt

I am an over the road truck driver and due to some states not allowing the use of scanners in a commercial vehicle this is the only thing available to have to alert us of adverse conditions. If you take this away we won't have anything that will prepare us to get to safety in a timely manner. Please let's not think of yourself in this matter, there are a lot of people depending on this service.
